

Lubricants Engineered for the Application

WearMaster[®] KF 39

Dry-Film Silicone Lubricant

WearMaster KF 39 is a dry film silicone based lubricant in an evaporative carrier. Its primary applications are for chain and conveyor lubrication where the use of an oil-based lubricant is not desired yet anti-wear and lubrication protection is needed. WearMaster KF 39 dry film lubricant bonds to the lubricated surface and withstands extreme temperatures without flash point and fire point concerns. The fluid carrier has a relatively low flash point, and the silicone lubricant is virtually non-flammable.

In addition, WearMaster KF 39 contains only FDA approved ingredients for use in areas of possible incidental food contact.

TYPICAL SPECIFICATIONS	
ISO Viscosity Grade	6
Viscosity cSt @ 40°C	6
Lubricant Components, %	3
Flash Point °F (°C), Min	130(54)
Fire Point °F (°C), Min	132(56)
Color	Clear
